Micron Technology coming to Syracuse Area

Micron Technology plans to spend up to **$100 billion** building a mega-complex of computer chip plants in Syracuse's northern suburbs in what would be the largest single private investment in New York history.

Micron announced thed details about the project, which would create up to **9,000 jobs** over the next 20 years at the White Pine Commerce Park in Clay.

The project is expected to bring an additional **40,000 supply-chain and construction jobs** to the Syracuse area and New York state.

The company's plans call for building a massive **7.2 million-square-foot** complex that will include the nation's largest clean-room space. The clean-room facilities alone would cover about **2.4 million square feet**, about the size of **40 football fields**.

Micron would build up to **four separate semiconductor fabrication plants** in phases at the 1,300-acre site off Route 31, said Micron President and CEO Sanjay Mehrotra.

Micron said the local employees would be paid an average salary of more than **$100,000** per year.

Rendering shows Micron Technology Inc.'s planned semiconductor fabrication facility in Clay

Largest Amazon Facility in NY is in Syracuse

At a ribbon-cutting ceremony for the 3.**8-million-square-foot** center on Morgan Road Thursday June 23rd 2022, company officials said the facility has already attained its initial goal of hiring 1,500 people and is continuing to hire.

The five-story building, known within the Amazon world as SYR1, is the **largest Amazon facility** in New York and serves much of the Upstate area, as well as parts of Massachusetts and Connecticut. And Amazon said the center will eventually serve customers in additional states.

In September 2022 the company's distribution center in Clay — at 3.8 million square feet, **one of the largest warehouses in the world** — employs over **2,500 full-time workers**, and plans to reach **3,000** by the end of October.
Just how big is the place? Consider this:

- The building currently holds **15 million products**, everything from books to electronics to consumer goods. As business ramps up, that number will rise to 40 million, according to Amazon.
- Around 10,000 robots operate inside the building, constantly carrying shelving units full of merchandise to and from humans for picking and sorting.
- More than 10 miles of computer-controlled conveyors wind through the entire structure, speeding merchandise from picking stations to packaging areas.
- **15,500 tons** of structural steel was used in its construction.
- You could fit **64 football fields** inside the building's five floors.
